

Wyvern college drug policy

Rationale

It is the aim of Wyvern College to help all students to be able to take their place safely in a world where a wide range of drugs exists. We recognise that some drugs have beneficial effects, but also that every drug has potential to harm. For this reason, all drugs need appropriate and responsible care and management. In order to be able to make informed choices, staff and students need to understand the nature of drugs, their social and legal status, their uses and effects.

Aims:

- To support the school's endeavour to maintain the safety and well-being of all students, staff and visitors.
- To clarify legal responsibilities, entitlements and obligations.
- To support all the members of the school community by providing clear guidance and procedures on drug related issues to ensure clarity and consistency.
- To develop a whole school approach to drug education in the context of the school curriculum.

Key roles and responsibilities

The Deputy Headteacher is responsible for drug related issues within the school.

Inclusive definition of drugs

Wyvern College defines a drug as a substance which, when taken into the body, changes the way we feel, the way we perceive things, and the way our body works. This definition includes illegal substances and also legal substances such as alcohol, tobacco, legal highs, solvents and medicines.

Drug Education

- **Context**

We will provide all students with drug education as an integral part of our Personal, Social and Health Education (PSHE) and Citizenship programme as well as through Science and Ethics lessons at Key Stage 4.

- **Ethos**

Drug education in our school aims to enable students to make healthy informed choices by increasing their knowledge, exploring a range of attitudes towards drug use and developing and practicing decision making skills. The programme we follow will be based on national and local guidelines for good practice and will be appropriate to the age and experience of our students.

- **Content and delivery**

Teaching will be based on an understanding that a variety of approaches should be used in order to meet the differing needs and learning styles of students. It is recognised that active or participatory learning styles can be particularly helpful in developing skills, knowledge and values.

- **Use of visitors and outside speakers**

We use visitors to support our planned teacher lead programme of education, in line with national and local guidance. We are careful to negotiate the use of visitors in line with the protocol for using visitors in Wiltshire Schools, so that their contribution fits our needs and they are clear how their input fits into our planned programme. The class teacher is always present when visitors are working with our students.

Managing drug related incidents: routine arrangements

- **Medicines**

The school has a policy/procedure for the administration of medicines that must be followed for everyone's safety. Our practice is in line with guidance as recommended by Wiltshire School Health and Safety manual.

- **Alcohol**
Students are not allowed to bring in alcohol onto the school site. Parents and visitors under the effects of alcohol will be asked to leave the premises and return at a later date for the safety of the whole school.
- **Tobacco**
The school is a no smoking site - indoors and outdoors, including school vehicles - at all times. Students are not permitted to bring to school smoking materials, including matches and lighters. In the interests of health and safety, should a student be found in possession of any of these on school premises, they will be confiscated.
- **Solvents**
The school will ensure that potentially hazardous substances are stored safely, and students will be supervised if it necessary that they come into contact with them in the course of their work. Students are not permitted to be in possession of solvent based products.
- **Illegal drugs**
No illegal drugs are permitted to be brought on to, or used on school premises.
- **Legal Highs**
'Legal highs' are substances which produce similar effects to illegal drugs (such as cocaine, cannabis and ecstasy) but that are not controlled under the Misuse of Drugs Act. Research shows known that the use of many 'legal highs' have been directly linked to emergency hospital admissions and, in some cases, deaths.

Incidents

A drug related incident may include any of the following:

- A student who is suspected of being under the influence of a drug
- Finding drugs, or related paraphernalia on school premises
- Possession of drugs by an individual on school premises
- Use of drugs by an individual on school premises
- Supply of drugs on school premises
- Individuals disclosing information about their drug use
- Rumours of drug possession supply or drug use.
- Reports of drug possession supply or drug use

Guiding principles

- A designated member of staff is responsible for coordinating the management of drug related incidents, offering sources of support and liaising with outside agencies.
- Incidents will be dealt with after making an assessment of the situation and be reported to the Headteacher.
- Appropriate support will be offered to those with substance misuse problems.
- Evidence of drug use or possession may result in fixed term or permanent exclusion.
- The school will always seek to respond appropriately to each individual case by selecting from a range of possible responses, that which is most appropriate.

Procedures

- **Medical emergencies**
If an individual is unconscious, is having trouble breathing, is seriously confused or disorientated, has taken a harmful toxic substance or is otherwise at immediate risk of immediate harm medical help will be sought and first aid given if required. The priority will be the student's safety.
- **Individuals in possession of drugs**
If any student or adult on school premises is found in possession of an unauthorised drug it will be confiscated. If the drug is suspected to be illegal, the school will contact the police and immediately hand over the drug. If the substance cannot be legally destroyed or disposed of it will be handed to the police as soon as possible and not stored for any longer than is necessary. Talking with an individual about a drug related incident will have as its purpose to confirm or reject suspicions or allegations, rather than to conduct a wider investigation. Parents of students will be informed and other professionals from the LEA, Young Persons Substance Misuse Service, Youth Service, Police, School Health Service, Social Service etc may be informed or consulted as appropriate.
- **Support for students**
Following actions to preserve immediate safety, the health and emotional needs of students will be considered. Support is available through the pastoral system to ensure a caring response to students in

distress. Interventions will be considered if the school feels a student is showing signs which indicate particular risks of, or from, involvement with drugs, whether their own or that of their parent or carer. Such interventions may include consultation and subsequent referral.

- **Recording**

All incidents will be recorded within 24 hours. Forms will be stored securely in the student's file and in the Deputy Head's office.

Confidentiality

Complete secrecy can never be promised to a student, though information given in confidence will only be disclosed to anyone else in the interests of Child Protection. If a student discloses that they are using a drug without medical authorisation, action will be taken to ensure that the student comes to no serious harm if this is considered a significant risk. Staff have a commitment to inform the student in advance of any disclosure of information to others and if possible enable the student to be involved in the process. Staff are committed to protect a young person's anonymity where their disclosure may implicate others. Regarding disclosures staff need to carefully define and communicate the boundaries of confidentiality offered.

Staff training and support

We recognise the need for staff to receive appropriate training to support their work in delivering the school programme of drug education and dealing appropriately with incidents should they arise. The school nurse and CPD coordinator, or other appropriate member of staff, will collaborate to organise training related to the identified needs of staff as required.
